

TAKE HOME MESSAGE

- There is an urgent and substantial need to identify Red Flags as early as possible to ensure that intervention is provided when the developing brain is most capable of change.
- High quality early intervention programs for vulnerable infants and toddlers can reduce the incidence of future problems in their learning, behavior and health status.
- *Intervention is likely to be more effective and less costly when it is provided earlier in life rather than later.*

Empowering Stakeholders of the Differently Abled

Workshop

When: On International Day of Persons with Disabilities, observed on December 3

Why December 3: The day is an international observance promoted by the United Nations since 1992 to promote an understanding of disability issues and mobilize support for the dignity, rights and well-being of persons with disabilities.

WHY EARLY IDENTIFICATION?

We believe in the adage “Catch them Young and Watch them Grow”

Decades of rigorous research show that children’s earliest experiences play a critical role in brain development.

The Center on the Developing Child at Harvard University has summarized this research:

- Neural circuits, which create the foundation for learning, behavior and health, are most flexible or “plastic” during the first three years of life. Over time, they become increasingly difficult to change.
- The brain is strengthened by positive early experiences, especially, stable relationships with caring and responsive adults, safe and supportive environments, and appropriate nutrition.
- Early social/ emotional development and physical health provide the foundation upon which cognitive and language skills develop.
- High quality early intervention services can change a child’s developmental trajectory and improve outcomes for children, families, and communities.
- Intervention is likely to be more effective and less costly when it is provided earlier in life rather than later

Resource Person

**Dr. M. S Mahadeviah, Paediatric Developmental Neurologist;
Hon. Medical Director-Spastics Society of India**

- Graduated from University of Mysore Medical College 1959, 1960-1983
- Trained and taught in Lincoln Hospital Developmental Paediatrics and Neurology at Albert Einstein College of Medicine New York 1965.
- Fellowship in Epilepsy at Montreal children's hospital, McGill University.
- Professor in Paediatrics, Albert Einstein College of Medicine
- Director for training Residents and Fellows in Developmental Paediatrics at Rose F Kennedy Center for Human Development, Albert Einstein college of Medicine New York.
- Served as Professor and Head of the Department of Paediatrics, K.I.M.S, Bengaluru
- At present Hon Professor at Kempe Gowda Institute of Medical Sciences [KIMS] in paediatrics. Honorary medical director at Spastics Society of Karnataka, Bangalore.
- Founder Member and Former President -Indian Academy of Cerebral Palsy.
- Former President, Indian Academy of Paediatrics, Karnataka, Fellow of the American Academy of Cerebral Palsy and Developmental Medicine

FAME Academy

Foundation for Action, Motivation and Empowerment

FAME Academy was established under FAME India – a fully philanthropic and not-for-profit organization with a vision to “Train and Empower Stakeholders of the Differently Abled”

WORKSHOP on – “Early Identification of Children with disabilities “The Role of Pediatricians and Medical Practitioners”

FAME INDIA, a Not for Profit Organization which works for training and empowerment of Children and young adults with Neuro developmental disabilities in Bangalore and Kanakapura villages proposes to conduct a half day workshop on “Early Identification of Children with disabilities-The Role of Pediatricians and Medical Practitioners”

Training Group: Practicing Pediatricians, Medical Professionals, PHC Doctors, Reproductive Health care Doctors, Post Graduate Medical Students, Final year MBBS students

Goal: The goal of this workshop is to provide a conceptually sound framework of knowledge, skills and attitude for Early Identification and Referrals for Early Intervention.

Workshop Objectives : On conclusion of the workshop, the participants will be able to

1. Use developmental screening tools
2. Identify early signs of high risk and at risk babies
3. Refer the high risk babies for early intervention services

Dates	:	Dec 3rd, 2016
Venue	:	Pai Viceroy Hotel, Jayanagar 3rd Block
Time	:	9.30 am to 1 pm
Workshop Fees	:	Rs.1, 000 per Participant
